

Task 1.2P: Ethics Agreement

As part of this unit, you may be exposed to systems, tools and techniques related to Information Security. With proper use, these components allow a security or network administrator to better understand the vulnerabilities and security precautions in effect. Misused, intentionally or accidentally, these components can result in breaches of security, damage to data or other undesirable results.

Since lab exercises may be carried out in part in a public network that is used by people for real work, you must agree to the following before you can participate. If you are unwilling to sign this form, then you cannot complete this unit.

Student agreement

I agree to:

- examine only the special unit accounts for privacy vulnerabilities.
- report any security vulnerabilities discovered to the unit instructors immediately, and not disclose them to anyone else.
- maintain the confidentiality of any private information I learn through the unit exercises.
- actively use my unit account with the understanding that its contents and actions may be discovered by others.
- hold harmless the unit instructors and my University for any consequences of this unit.
- abide by the computing policies of my University and by all laws governing use of computer resources on campus.

I agree to NOT:

- attempt to gain root access or any other increase in privilege on any University workstation.
- disclose any private information that I discover as a direct or indirect result of a unit exercise.
- take actions that will modify or deny access to any data or service not owned by me.
- Attempt to perform any actions or use utilities presented in the laboratory outside the confines and structure of the labs.
- utilize any security vulnerabilities beyond the target accounts in the unit or beyond the duration of the unit.
- pursue any legal action against the unit instructors or the University for consequences related to this unit.

I have read and agree with Task 1.2P instruction sheet conditions and terms of service.

(see next page)

I have read the code of ethics and agree to abide by it.
